

From 4 analysts to 92.

From <\$1M to a \$100M raise.

How Ops Clover built and scaled a 92-person fraud decisioning operation that powered Snappt through hypergrowth — 11,000 fraud decisions per day at <0.2% false positive rate.

THE CUSTOMER

Snappt is a fraud detection platform for rental applications. Their technology flags manipulated documents — pay stubs, bank statements, IDs. Every flagged submission required a human fraud decision: is this genuinely fraudulent, or a false positive? As volume grew, they needed a team that could make those calls accurately, at scale, around the clock.

WHEN WE STARTED

Company: 15–20 employees, <\$1M ARR
Fraud team: None — build from scratch
Processes: No SOPs, no QA, no reporting
Challenge: Product worked, volume growing, no ops

WHAT WE BUILT

— 92 people at peak

Fraud Analysts

<0.2% false positive rate, 4–5 min TTR

70+

Fraud Managers

Daily ops, shifts, performance, escalations

8–10

Fraud Specialists

Training, reporting, tools, standardization

6–8

QA Analysts

Re-reviews, accuracy tracking, process improvement

4–6

Fraud Researcher

Proactive threat intelligence — identified new attack tools, updated Snappt's blacklist to block fraud before it reached the queue

1–2

We owned:

Recruiting · Onboarding & training · SOPs & knowledge base · QA framework · Comp & benefits · Career paths · Data labeling for AI/ML

THE SCALE JOURNEY

FOUNDATION

Months 1–6

4

team

Milos as team lead + 3 analysts. Built workflows, SOPs, reporting from scratch.

STRUCTURE

Months 6–18

15–25

team

Formalized QA, training, recruiting pipeline, SOPs and knowledge base.

HYPERGROWTH

Year 2–3

92

team

Scaled to 92. 24/7 coverage. Fraud Specialists. Data labeling for AI/ML.

ENTERPRISE OPS

At scale

11K

dec/day

11K decisions/day. 4M+ total. Fraud Researcher blacklisting attack tools.

THE RESULTS

92

analysts at peak

11,000

fraud decisions/day

<0.2%

false positive rate

4M+

total fraud decisions

24/7

across timezones

2.5–3 yr

avg analyst tenure

WHAT MADE IT WORK

Turnkey Management

Full employee lifecycle — recruit, onboard, train, manage, comp, benefits, career paths. Adding capacity was a conversation, not a project.

Quality at Scale

QA from day one. Randomized re-reviews and coaching loops maintained <0.2% FP at 11K decisions/day.

Proactive Threat Intel

Fraud Researcher identified new attack tools and updated Snappt's blacklist — blocking threats before they hit the queue.

Retention Culture

2.5–3 yr avg tenure. Clear career paths and investment in people.

Snappt raised \$100M from Insight Partners.

Our 92-person fraud review operation — 11,000 decisions/day — was critical to the scale story that made it possible.
